Materiality Process

Explain how you applied the materiality principle (or the materiality process) in identifying your material topics. ¹
<p>PNCC’s Materiality Process is a work in progress in line with the Sustainability Frameworks, standards and best practices guided by its Quality Management System and Performance Scorecard as required by the Governance Commission for GOCCs. PNCC’s existing Quality Management System (QMS) has been established pursuant to ISO 9001:2015 standard which adopts the process approach and risk-based thinking in developing, implementing and improving the effectiveness of its QMS. The Plan-Do-Check-Act cycle has been applied to all its processes. The PNCC’s QMS determined the external and internal issues that are relevant in its strategic direction and affect its ability to achieve the intended results. In understanding the organization, it considered the issues arising from legal, technological, competitive, market, cultural, social and economic environments, whether international, national, regional or local. While the Performance Scorecard as required by the Governance Commission for GOCCs was based on Organizational Performance Indicator Framework (OPIF) logframe and Major Final Outputs (MFO) which later migrated to Performance Evaluation System (PES) framework. The PES required PNCC to determine its Charter Statement consists of Vision, Mission and Core Values consistent with PNCC’s mandate and adds value to the strategy of its stakeholders. Further, the PES likewise required PNCC to build the strategy map that describes the connection between and among the objectives arranged in order to build value to the stakeholders of PNCC. The strategic objectives which grouped by strategic perspective viz Social Impact, Stakeholder/Customer, Finance, Internal Process and Learning and Growth define what major thrusts the PNCC will pursue to achieve its vision.</p>
